

KONICA MINOLTA

The essentials of imaging

## About Konica Minolta

Throughout the business world, people are talking about bizhub -- the central document resource that streamlines workflow, speeds document output, enhances network communications and improves both security and simplicity.

The bizhub concept comes from Konica Minolta Business Solutions Australia, a wholly owned subsidiary of Konica Minolta Holdings, Inc. By bringing together two companies with more than 200 years of combined experience and technological innovation, Konica Minolta could focus unprecedented resources on the development of the bizhub range -- mobilising core competencies in optics, printing and copying, digital scanning and networking software to create a new and more cost-effective approach to multifunctional productivity.

With headquarters in Sydney, Konica Minolta Business Solutions Australia provides customers with complete bizhub solutions to create, reproduce, manage, share and distribute documents and electronic files more quickly and productively. Konica Minolta supplies bizhub solutions for any-sized business need, from small offices and workgroups to branch locations, large central reprographic departments and production print facilities. Its complete bizhub and related products includes:

- Colour bizhub models that combine both high-speed colour and cost-effective B&W output, for higher communications impact as well as everyday document needs.
- The bizhub Office line of multifunctional printer/copiers with flexible scanning and optional fax capabilities, with output speeds ranging from 16 ppm to 75 ppm.
- The bizhub PRO production print systems for central reprographic department and print-for-pay facilities, with duty cycles up to 1.5 million impressions per month.
- Software solutions in the PageScope family, bridging the gap between computers and document systems and offering integrated device and document management.
- Automated finishing, high-volume facsimile and other options to expand the functionality of bizhub devices for fast, economical in-house document production.
- Desktop monochrome and colour laser printing systems that provide stand-alone economy, superior image quality and rugged, reliable performance.
- Professional services to improve infrastructure management, enhance network efficiency and streamline document delivery processes.
- Advanced digital scanning systems for managing document archives and bringing hard-copy text and graphic resources into the digital era.
- World-class sales, service and support through an extensive network of direct sales offices and independent dealers, throughout Australia and the Pacific Islands.

KONICA MINOLTA

The essentials of imaging

## About Konica Minolta

Next-generation bizhub systems from Konica Minolta are designed to meet the evolving needs of today's office/workgroup and production print business, streamlining document production and incorporating colour into communications. They are also designed to reduce the need for redundant or underutilised equipment -- and with built-in hard disk drives, many bizhub systems can replace servers or computer storage devices with a "hub" that combines input, output and storage capability.

In a wide range of business and professional applications, bizhub business users can print, copy, scan, email and fax from a single central resource. They can also manage network jobs, store forms and documents, transfer digital documents, send high-speed B&W and high-quality colour copying jobs remotely, and finish documents seamlessly and efficiently.

In 2005, Konica Minolta took bizhub to the next level with bizhub OP: a new "open platform" architecture and interface designed to improve multifunctional performance, deliver a common user experience, bring new advantages in management and security, and encourage third-party software integration.
